GL.iNet First Install Checklist

Steps to take on your computer	Steps to take on your node hardware
☐ Download the AREDN® **sysupgrade.bin** file for your device from **arednmesh.org**	*None*
☐ Connect your computer's Ethernet port to your device ☐ Verify that your computer received an IP address from the node's DHCP service ☐ Navigate to the GL.iNet web interface (default URL = http://192.168.8.1)	☐ Answer the initial GL.iNet configuration questions ☐ Navigate to the *Upgrade* menu and click *Local Upgrade* to select the **sysupgrade.bin** file you downloaded previously
None	☐ Verify that you **uncheck** the *Keep Settings* checkbox (GL.iNet settings are incompatible)
None	☐ After the firmware image is uploaded to the device, it will process the image and reboot twice (this process takes several minutes)
☐ Verify that your computer is assigned a new IP address automatically using DHCP, then disconnect & reconnect the Ethernet interface ☐ Open a web browser and enter http://localnode as the URL to begin using your new node	*None*
