yiffy-e13.ckpt [778b38ae]

first 4 epochs were trained on ~70k images with lama infilling (the cause of all of our headaches, because the network found a pattern in the edges and started replicating it everywhere)
next 6 epochs were trained on ~120k images with random cropping and a lower LR
last epochs were done on a different dataset, not bigger than 150k
IMPORTANT NOTE: during training explicit was misspelled as **explict**. Using the misspelled version results in better cocks. Sorry :<

yiffy-e18.ckpt [50ad914b]

Based on yiffy-e15, trained for a further 3 epochs using a dataset of 210k images from e621.

This will likely be the last epoch for quite some time, because until further improvements to other parts of the network (such as a custom VAE, variable res, etc), we think that further training is not necessary because the model has converged on a decent style for now.
IMPORTANT NOTE: during training explicit was misspelled as **explict**. Using the misspelled version results in better cocks. Sorry :<

Zack3D_Kinky-v1.ckpt [1a75d5c6]

This is a NSFW model trained from SD v1.4, great for general furry but specializes in the kinky side of art such as Transformation, latex, tentacles, goo, ferals, bondage, and a lot more that I cant remember. Uses over 100k images all aesthetics filtered. Prompt is raw E621 tags, so with underscores.

Hiten girl_anime_8k_wallpaper_4k.ckpt [7831dea3] (Dreambooth)

Useful for merging.
Custom Dreambooth model based off of the artist Hiten. Dataset was 6 training images, and 34 regularization images. Trained for 4000 steps.
Uses the Waifu Diffusion v1.2 model as a base.
To use the model, simply insert the name 'Hiten' into your prompts. The class token used was 'girl_anime_8k_wallpaper'. Append the class
token after Hiten for stronger results. EX: "1girl by Hiten girl_anime_8k_wallpaper"
